PROJECTS

Prediction of admissions in engineering colleges

- **Developed** a machine learning system to predict the most suitable engineering college and branch for students based on entrance exam scores, subject preferences, and placement trends..
- **Implemented** and evaluated models including **Decision Trees, Random Forest, Neural Networks, and K-Nearest Neighbors** for accurate admission prediction..
- **Performed** data preprocessing, feature engineering, and exploratory data analysis (EDA) to uncover key factors influencing college and branch selection.
- **Achieved** strong prediction **accuracy** through hyperparameter tuning and cross-validation, supporting informed decision-making for students.
- **Proposed** future enhancements such as psychometric testing integration and user-friendly recommendation tools to improve student guidance.
- **Technologies Used:** Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn.

TECHNICAL SKILLS

- **Programming Languages:** Python
- **Database:** MySQL
- **Frontend Technologies:** HTML, CSS
- **FrameWorks:** Django

CERTIFICATIONS

- Machine Learning with python

SOFT SKILLS

- Ability to work individually and in group
- Hard Working
- Time management
- Logical Thinking
